SUMMARY

First-year **B.Tech Computer Science student** and **Python Developer** with a focus on building transparent, community-driven digital tools. I spent three years growing a **30,000-member digital ecosystem**, which taught me that the best software is built to solve real problems for real people. I now leverage **asynchronous programming** and **AI workflows** to architect secure backend solutions and open-source tools.

PROJECTS

TrustFlows – NGO Transparency Platform (Hackathon Project) | *Flask, MongoDB, (Jan, 2026)*

- Developed a **full-stack digital presence** for NGOs featuring a **secure admin dashboard** for managing donations, audits, and impact reports.
- **Implemented** blockchain-backed transaction logging to ensure 100% transparency and auditability in fund utilization.
- **Engineered** a **dual-storage system** with MongoDB for persistent data and an in-memory fallback for high-availability demo modes.

MukeshRobot – Open Source Management Bot | *Python, Docker, MongoDB (2022-Ongoing)*

- **Pioneered** a high-performance Telegram automation tool utilizing a hybrid framework approach to optimize concurrent processing
- **Scaled** and maintained an open-source codebase to 100+ Stars and 350+ Forks on GitHub, facilitating community-driven feature updates
- **Designed** a hierarchical permission architecture (Owner, Sudo, Support) to automate moderation and security for thousands of active group environments

LEADERSHIP & COMMUNITY MANAGEMENT

Founder & Executive Lead | Mastermind Network Ecosystem (Telegram) | *2021 – 2024*

- **Orchestrated** and scaled a **digital educational** community to **30,000+ members,** managing a complex network of **academic resource** channels.
- **Directed** and mentored a remote team of **15+ Administrators,** implementing **moderation policies** to ensure **24/7 engagement** and **rule enforcement**.
- **Automated** community workflows by engineering custom bots to handle mass user queries, resulting in content reach exceeding 216,000+ views per announcement

EDUCATION

B.B.S College of Engineering and Technology (AKTU)
Bachelor of Technology (B.Tech), Computer Science & Engineering | *2025 – 2029*

SKILLS

- **Languages:** Python (Asynchronous), C (Data Structures), JavaScript, HTML/CSS
- **Frameworks**: Flask, Pyrogram, Telethon, python-telegram-bot, REST APIs
- **Databases & Tools:** MongoDB, SQL, Git/GitHub, Docker, Heroku, VS Code
- **AI & Cloud:** GenAI Workflows, AI Agents, Prompt Engineering, Google Cloud

CERTIFICATIONS & AWARDS

- **AI & Cloud**: Gen AI Academy 2.0 (**Google Cloud)** & 5-Day AI Agents Intensive (**Kaggle/Google**).
- **Blockchain**: Winter School on Decentralized Trust (**IIT Madras CyStar**).
- **Winner**: '*Best UI/UX Design*' (**CodeStrom '25**) & Tech Quiz (**Nova Fest**).
- **Runner up** :Talent Search Computer Awareness Quiz Competition(**CSI**).
- **Technical Writing:** 10-Day Technical Scripter Challenge (**GeeksforGeeks**).
